AED Defibrillator Course

Introduction

Offshore Marine Academy offers a comprehensive Automated External Defibrillation (AED) programme based on the necessary theory, backed up with practical sessions. The course is run over half a day, and is made as informative, yet as enjoyable as possible, thus allowing the students to gain confidence in what is a new and possibly somewhat daunting skill.

In addition to training we are able to offer advice in areas such as company protocols, purchasing equipment and on-going help and support with training and development. Training conforms to current Resuscitation Council (UK) guidelines.

Training Content

The following subjects are covered:

- Basic Anatomy & Physiology of the Respiratory System
- Basic Anatomy & Physiology of the Circulatory System
- Basic Life Support Practice
- Chain of Survival and Benefits of Early Defibrillation
- Resuscitation Council Guidelines on the use of AEDs
- Introduction to an AED & General Safety Precautions
- Demonstration – Cardiac Arrest Simulation
- Written & Practical Assessment

Training Facility

Training will take place at the Offshore Marine Academy premises in Bristol.

Duration

This programme will be delivered in half a day.

Cost

£95.00 plus VAT.
